**PRACTICE MAKES PERFECT,
ESPECIALLY WITH THE NEW MARK-MY-TIME™ FOR MUSIC
DIGITAL METRONOME**

Bookmark, Digital Timer and Metronome Combined Into One Practical Product

CHANDLER HEIGHTS, AZ – Music students now have an exciting new product designed to facilitate practice sessions. The new Mark-My-Time™ for Music Digital Metronome conveniently combines the benefits of a bookmark, digital timer and metronome into one easy-to-use product.

Music students can record their practice time at the touch of a button. An easy-to-read programmable countdown timer with alarm alerts students when the practice session is over. A cumulative timer is also available for convenient recording of multiple practice sessions.

And to keep students up with the beat, there is also a built-in metronome with adjustable beat settings of 10bpm and a tempo range of 10/200 bpm. Flashing indicators show the beat. An integrated clip allows for convenient attachment to music or a music stand. The slim design of the product fits easily into any music book.

The product is also ideal for tracking reading times, workout sessions and a wide variety of other practice sessions. Powered by an inexpensive, replaceable battery, and made of durable polyethylene, the new Mark-My-Time For Music Digital Metronome is designed for years of use.

Available for \$19.95 beginning in the winter of 2006.
